

FINAL DIAGNOSIS:

TCGA-AZ-4684

PARTS 1

AND 2: RECTOSIGMOID COLON, ANASTOMOTIC RINGS, LAPAROSCOPIC COLECTOMY AND ANASTOMOSIS -

- A. FUNGATING, NON-CIRCUMFERENTIAL, INVASIVE, MODERATELY TO POORLY-DIFFERENTIATED COLORECTAL ADENOCARCINOMA, 5.5 CM IN GREATEST DIAMETER. CARCINOMA STRADDLES THE

RECTOSIGMOID JUNCTION WITH INVASION THROUGH MUSCULARIS PROPRIA AND FOCAL EXTENSION INTO PERICOLORECTAL ADIPOSE TISSUE.

- B. PRESUMED ANGIOLYMPHATIC INVASION (See diagnosis D).
C. ALL SURGICAL RESECTION MARGINS ARE BENIGN. CARCINOMA IS 0.5 CM FROM THE CLOSEST (circumferential) RESECTION MARGIN (Slide 1I).
D. METASTATIC COLORECTAL ADENOCARCINOMA IS PRESENT IN TEN OF TWELVE (10/12) REGIONAL LYMPH NODES. THE LARGEST METASTATIC FOCUS MEASURES 1 CM IN GREATEST DIAMETER (Slide 1U). NO EXTRACAPSULAR EXTENSION IS IDENTIFIED (see comment).
E. TWO SMALL HYPERPLASTIC POLYPS (Slides 1O and 1P).
F. NON-NEOPLASTIC COLORECTAL MUCOSA WITH NO SIGNIFICANT HISTOPATHOLOGIC ABNORMALITY.
G. TNM PATHOLOGIC STAGE: pT3, N2, Mx (see Synoptic).

PART 3: APPENDIX, APPENDECTOMY -

- A. APPENDIX WITHOUT HISTOPATHOLOGIC ABNORMALITY.
B. NO EVIDENCE OF MALIGNANCY.

PART 4: RIGHT DOME OF LIVER, LIVER BIOPSY -

METASTATIC COLONIC ADENOCARCINOMA IN LIVER (Slides 4A and 4B).

CASE SYNOPSIS:

SYNOPTIC DATA - PRIMARY COLON, RECTAL, APPENDIX TUMORS

SPECIMEN TYPE: Rectal/rectosigmoid colon (low anterior resection)

SPECIMEN LENGTH: 23.5 cm

TUMOR SITE: Rectosigmoid

TUMOR CONFIGURATION: Exophytic (polypoid)

TUMOR SIZE: Greatest dimension: 5.5 cm

Additional dimensions: 3.5 cm

INTACTNESS OF MESORECTUM: Complete

HISTOLOGIC TYPE: Adenocarcinoma

HISTOLOGIC GRADE: Other: Moderate to poorly differentiated

PATHOLOGIC STAGING (pTNM): pT3a/b

pN2

Number of nodes examined: 12

Number of nodes involved: 10

pM1

Site(s): Liver

MARGINS:

Proximal margin uninvolved by invasive carcinoma

Distal margin uninvolved by invasive carcinoma

Circumferential (radial) margin uninvolved by invasive carcinoma

Mesenteric margin uninvolved by invasive carcinoma

ANGIOLYMPHATIC INVASION:

Present

PERINEURAL INVASION:

Absent

TUMOR BORDER CONFIGURATION: Infiltrating

TUMORAL LYMPHOCYTIC RESPONSE: Mild to moderate

ADDITIONAL PATHOLOGIC FINDINGS: Other polyps (type[s]): Two hyperplastic polyps
